JUSTFITME ACE HERO PERSONAL EMS POWERKIT

Designed with you in mind, the Ace HERO introduces a range of exciting features, including our advanced PowerPulse technology, setting it apart from the rest.

JUSTFITME ACE HERO TUSH & HIP EMS MULTITONER PANTS

Sculpt your body and enhance your fitness levels while enjoying ultimate relaxation.

HOW DOES JUSTFIT EMS WORK?

During traditional strength training the brain sends bioelectrical impulses which cause certain muscles to contract. However, not all muscles have a well-developed connection to the brain, and these muscles are not as easily activated, therefore they will not develop so well. This way we can never train with full force, even if we want to.

EMS (electrical muscle stimulation) however, with low-strength electrical impulses, directly stimulates our deep muscles thus deceiving our body's natural reactions and training almost 100% of our musculature.

EMS training is a completely safe form of working out and as such, it has been used for medical and rehabilitation purposes for a long time.

ADDITIONAL ELECTRICAL IMPULSES

ELECTRICAL IMPULSES BY THE BRAIN

ADDITIONAL ELECTRICAL IMPULSES

JUSTFIT QUALITY

All Justfit products meet the highest European quality standards. We put a lot of emphasis not only on functionality and safety our products, but also on design and style.

CE CERTIFICATE

Justfit products have been CE marked (Conformité Européene) indicating compliance with health, safety and security standards for products sold in European Economic Area (EEA).

MAJOR BENEFITS OF JUSTFIT EMS TRAINING

TIME SAVING

The training only takes 20-25 minutes and trains the entire musculature simultaneously.

HIGHLY EFFECTIVE

While the results of traditional training are visible after 15-20 trainings, EMS gives you visible results after 4-5 sessions.

3X FASTER WEIGHT LOSS

EMS is the most effective form of calorie-burning training, with which you can reach the optimal body fat percentage within the shortest possible time.

ANTI-CELLULITE EFFECT

Fight cellulite by improving blood circulation and lymphatic drainage through massage. Draining not only stimulates blood and lymph circulation, but also breaks down the fat cells that cause cellulite groups.

STRONGER SKELETAL MUSCLES

Back pain due to weak skeletal muscles can be relieved by strengthening the muscles next to the spinal column.

METABOLISM

EMS promotes a high level of metabolic activity during and for many hours after a training session.

BUILDING MUSCLES

The higher your metabolism, the better your body will burn fat and build lean muscle mass.

PROTECTION OF THE JOINTS

Joints are relieved due to the precise targeting of the electrical impulses in the muscles.

GENERAL WELLBEING

The electrical impulses reach the deep skeletal muscles improving posture and general well-being.

PERFORMANCE ENHANCEMENT

EMS is ideal for building sport-specific strength, improving the quality of muscle contractions, and balancing imbalances.

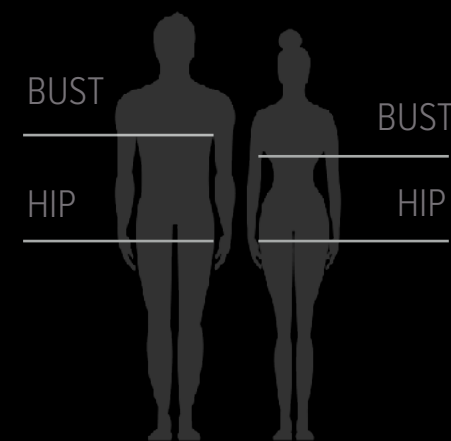

JUSTFITME ACE HERO POWERSUIT

Like the original Ace, you'll relish a studio-like experience during your home training, reaping the heightened benefits of EMS training. But what's fresh with Ace HERO?

-  Advanced PowerPulse Technology - targeted impulses with unmatched intensity
-  Comfort+ Enhancement - a set of dry and wet electrodes included
-  PowerHub Gen2 (control unit) at Your Side
- Revamped Design
- Internal Cables for Ultimate Comfort
- Quick and Easy to Put On and Take Off
- Washable with Cables

Size chart

	XS	S	M	L	XL
HIP (cm)	70-84	80-94	88-104	98-120	110-134
BUST (cm)	64-100	68-106	76-110	90-122	102-140

ADVANCED POWERPULSE TECHNOLOGY

Imagine every muscle fiber activated to its fullest potential, igniting a cascade of energy throughout your body. With PowerPulse, you'll feel the difference from the very first session as your muscles respond to the powerful yet controlled impulses, driving your workouts to new heights of effectiveness.

But PowerPulse is more than just raw power—it's about optimizing your performance while minimizing fatigue and discomfort. Our proprietary algorithms ensure that each pulse is tailored to your body's unique needs, providing optimal stimulation without overwhelming your muscles.

UNIQUE COMFORT+ ENHANCEMENT

The HERO family stands out for its versatility, offering both wet and dry electrodes for the customer's preference. While dry electrodes are recommended for outdoor activities like running, wet electrodes are ideal for indoor workouts. Uniquely, this is the only product on the market that allows users to choose between both options, catering to various training environments and preferences.

CONTENT OF THE KIT:

01. JustfitMe HERO Powersuit
 02. Set of dry and wet electrodes
 03. JustfitMe app (Android/iOS)
 04. PowerHub Gen2
 05. Underdress
- + User manual
